

Designing and Using Databases for School Improvement

TABLE OF CONTENTS

Foreword	xi
Preface	xv
1 Introduction: The Need for a Database for Schoolwide Improvement	1
Imagine...	2
Databases Are Important to School Improvement	3
Barriers to Creating Databases	6
The Purpose of this Book	7
Summary	10
2 Defining the Scope	13
Designing the Database	16
Example District	32
Summary	46
3 Readyng Data for the Database	47
Focus the Database	48
What Data?	48
Data Elements	51
Existing Data	54
The Design	56
Database Coordination	60
Summary	63
4 Transforming the Data into Information	65
Transforming the Data into Information through Data Analysis	66
Challenge School District	95
Summary	96

5	Translating the Information into Schoolwide Improvement	97
	Beginning the School Improvement Process	98
	Summary	103
6	Using the Database at All Levels – District, School, Classroom	105
	San Jose Unified School District	106
	Laurens County School District 56	106
	River Road High School	107
	Another School District	109
	Student Performance Monitoring System	109
	Homegrown Database Systems	110
	Making Data Accessible to Teachers	110
	Summary	111
7	Summary and Conclusions	113
	Building a Database	114
	Database Solutions	116
	The End User	117
	Maintaining and Administering the Data Warehouse	117
	Summary	118
	Appendix: Database Needs Analysis Tool	119
	Glossary of Terms	125
	References and Resources	137
	Index	141
